

Love your smile.

a journey through the space, colours, planets

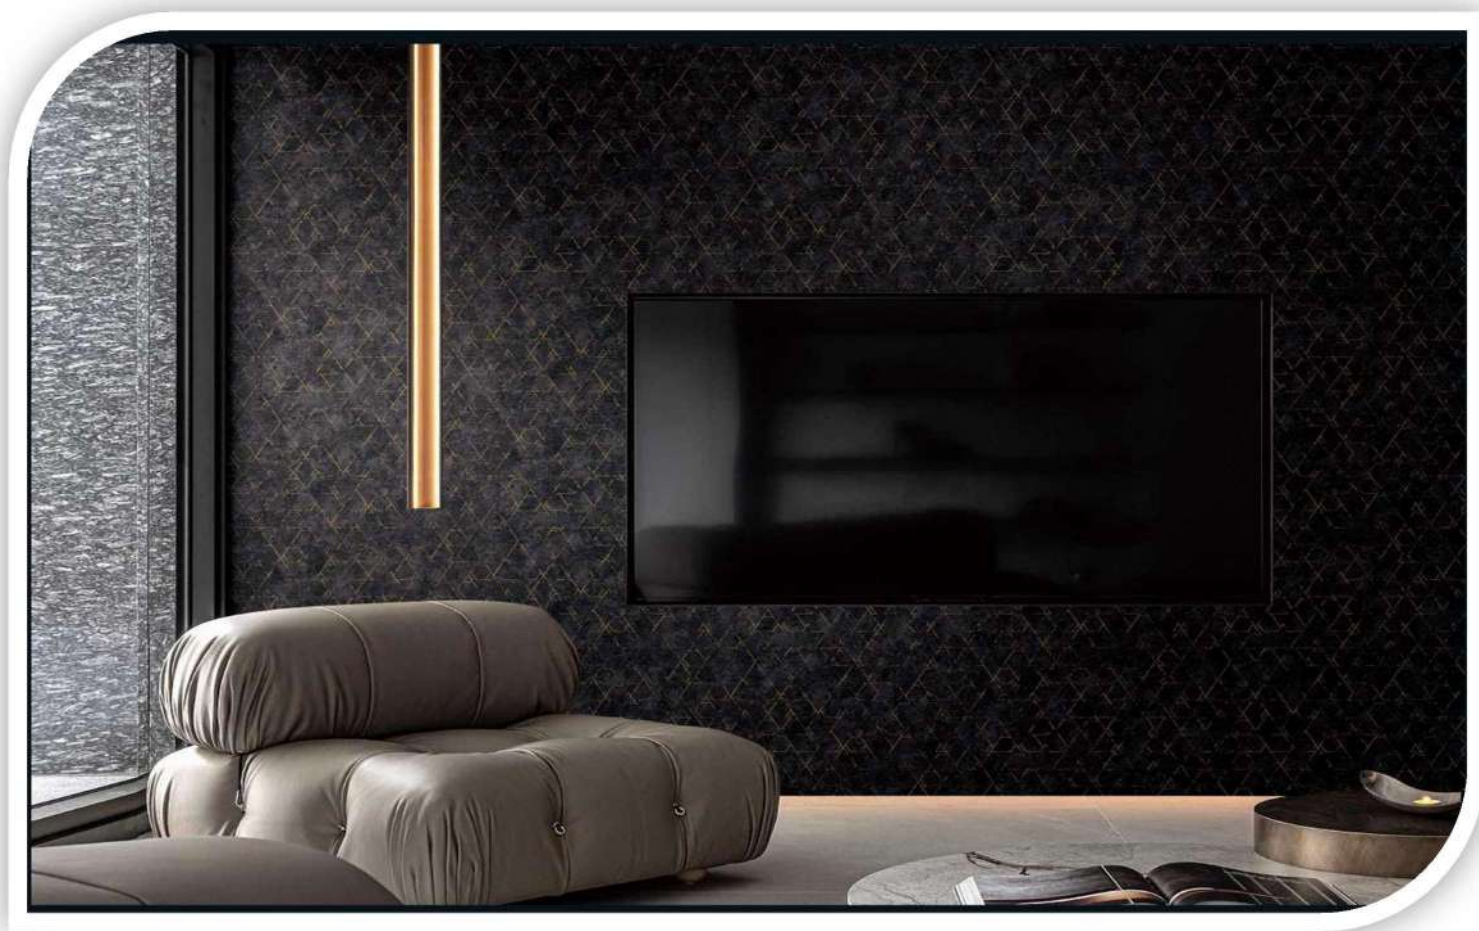

In this increasingly colourful world, people can detect a numerous amount of colours that could be divided into primary, secondary and tertiary colours. But if we are talking about the division in colours, then they could be simply divided into achromatic and chromatic colours.

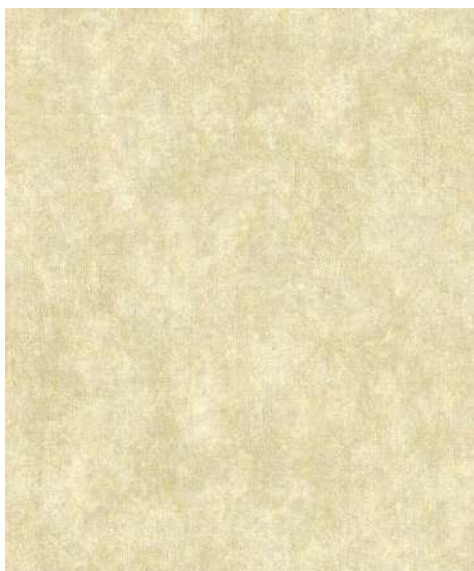

A favorite color Kingdom

Throughout the year, the natural color plate will pour out the color and different landscape. There are flowers in spring and summer autumn winter Liucui, dyed golden yellow snow. Every season I will be in a different color to the world, superimposed seasonal landscape with natural. The spring grass tucui, the recovery of all things, Qunfang Zhengyan, surrounded by flowers.
